

Integrated Management System Policy

As a company with more than 100 years of history of continuous cement production, we believe that people are behind every success. People for whom we develop high quality aluminium cements. People for whom we provide safe labour conditions and protect the natural environment.

With this vision in mind, we pursue the following objectives within the Integrated Management System Policy:

QUALITY

To win our customers' satisfaction at provided products, the measure of which is our pursuit of the "0 claim" target.

SAFETY

To undertake effective measures to protect life and health of persons staying and working on the site of Górka Cement. These are measured by our pursuit of the "0 accidents" target.

ENVIRONMENT

To minimise the impact on the environment and to have respect for natural resources at each stage of operation: from purchasing raw materials through production and delivery to the client.

Trzebinia, 16.10.2015 r.
