

10 SAFETY rules

I always use the equipment preventing me from falling down while working at heights.

I never remove anti-hazard protections.

I disconnect sources of power and put up a tag-out board while carrying out general repairs.

I always keep my and other people's safety in mind while driving vehicles.

I always use protective equipment wherever it is required.

I do not drink alcohol and do not take narcotics at work.

I work in a confined space only upon a written command.

I keep my workplace tidy because disorder can cause accidents.

I actively cooperate to increase safety.

I do not "cut corners" when it comes to the occupational safety and health issues.

Remember and follow
